### Notes for Lists of Casinos

A change from last report is denoted by a plus, minus, or asterisk in the left margin. Plus means a change most would consider to be for the better, and minus means a change most would consider to be for the worse. An asterisk means a change that cannot generally be described as for the better or for the worse.

The “tables” columns show total tables with the specific rules delineated in the "rules" column, usually adding together tables of different minimums and maximums within that rule set. Some tables might have been closed when the reporter visited.

The “edge” columns show the percent advantage the casino has over a basic-strategy player.

The “cut” columns show the number of decks yet unseen when the dealer is undecided on whether to shuffle or deal another round, or where the cut card is inserted if one is used.

The “min” columns show usual minimum bets; the actual minimums might be lower on weekdays and higher during the busiest hours.

The “max” columns show usual maximum bets; the actual maximums might be lower on weekdays and higher during the busiest hours.

The “rules” columns show deviations from: BJ pays 3:2; one bet lost to a dealer’s BJ; the dealer does not look at the hole card; you may double down on any two cards but not after splitting; you may split any pair; you may resplit any pair except aces to make up to four hands; split aces receive one card each; insurance; and no surrender. The Key to Rules begins three pages before the final page of this issue.

We do not list 6:5 games, continuous shuffling machine games, or most other carnival games.

"Database participant" means the casino is known or reasonably believed to be an active participant in one or more outside databases of law-abiding but unwelcome skilled patrons, in addition to its internal corporate database.

The letter "t" after the report date indicates that the last in-person report was over 18 months ago, and we therefore updated the information by telephone interview with appropriate casino personnel. The reader is cautioned that this information is dependent on the knowledge and integrity of the casino employee(s) providing it. We offer the information in the belief that a fresh telephone report is likely more useful than a very old in-person report.
